

NEW PRODUCT ANNOUNCEMENT

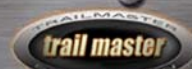

August 23, 2007

1999 -2004 FORD SUPERDUTY F250/350 4WD STEERING STABILIZERS SINGLE STEERING STABILIZER - PART NUMBER 7193 DUAL STEERING STABILIZER - PART NUMBER 7289

Trailmaster Suspension provides SSV (Speed Smart Valving™) technology to our steering stabilizers. Steering stabilizers are essentially a shock absorber for your steering system. They are highly recommended for all vehicles with over-sized tires. Stabilizers dampen out wheel shimmy and help prevent the steering wheel from being jerked out of your hands in rough terrain or when a road hazard is struck by the front wheels. A steering stabilizer is a proven safety device in the event of a blow out.

Steering stabilizers are engineered to restrain "bump steer" and front end vibration, giving added life to tires, ball joints and other steering components. Single and dual applications are available. Every steering stabilizer is specifically designed for each application.
