

# NEW PRODUCT ANNOUNCEMENT

Trail Master's Torsion Keys are the fastest and easiest way to get that level stance for your truck that you've been looking for. Torsion Keys generally can be installed in about an hour and provide an adjustable 1.5-2.5 inches worth of lift to the front suspension to get rid of that "factory rake". In most applications tires up to 33" in height can be installed on vehicles equipped with our torsion keys. Trail Master's torsion keys are the most affordable kit on the market and do not cause any added stress to your vehicle or suspension.

- ♦ The fastest and least expensive way to get that level stance for your truck ♦ Maintains quality factory ride ♦ No added stress to your vehicles suspension ♦ Provides an adjustable 1.5 to 2.5 inches of lift ♦ Tough powder coat finish ♦ Accommodates 33" tires ♦ Torsion Keys are the most affordable kit on the Market
